About Me

Software Engineering undergraduate specialized in **MERN stack** web development, with strong expertise in **React-based frontend engineering**. Seeking a Junior Web Developer or internship role where I can contribute to building scalable, user-centric real-world problem solutions while continuously strengthening my **full-stack development** skills and exploring new technologies.

Skills

- **Programming Languages** : JavaScript (ES6+), TypeScript, C, C++, Java
- **Frontend** : HTML5, CSS3, React.js, React Router, Tailwind CSS, DaisyUI, Next.js (basic)
- **Backend** : Node.js, Express.js, REST APIs
- **Databases** : MongoDB, MySQL, Oracle SQL (PL/SQL – basic)
- **Tools & Platforms** : Git, GitHub, Firebase (Auth & Hosting), Vercel (Backend Deployment), Axios, ESLint, Vite
- **Interpersonal Skills** : Team collaboration in university projects, Time management & adaptability

Projects

Blood Bridge – Blood donation web app

[Client Repository](#) | [Server Repository](#) | [Live Website](#)

Connects donors and seekers with real-time requests and admin analytics.

- Built admin **analytics dashboard** with charts and system statistics.
- Implemented **role-based system** for seekers, donors, and admins with secure JWT authentication.
- Enabled real-time **donor search & blood request workflow**.

Ghor Bari – Smart property listing & deal management platform

[Repository](#) | [Live Website](#)

Connects owners, buyers, and renters through verified listings, negotiations, real-time chat, and admin monitoring.

- Built a property marketplace with **geo-search, filters, wishlist, comparison, and listing management**.
- Implemented **RBAC** with **Firebase Auth, JWT, NID verification**, and **admin moderation** for users and listings.
- Engineered **real-time chat, negotiation flows, email notifications, AI property insights**, and **system analytics**.

WarrantyWallet – Smart Warranty & Claim Management System

[Repository](#) | [Live Website](#)

A digital vault for managing product warranties, document storage, and automated expiry notification.

- Implemented **RBAC** (Admin/User), Firebase Admin SDK, and JWT for secure access.
- Engineered an **automated notification engine** using Nodemailer for proactive expiry alerts.
- Integrated **ImgBB API** for cloud-based invoice storage and **Chart.js** for real-time platform analytics.

Education

BSc. in Software Engineering

ISLAMIC UNIVERSITY OF TECHNOLOGY

2023 - 2027 (Expected)

Certification

- Complete Web Development Course – Programming Hero

Language Proficiency

- Bangla – Native
- English – Fluent
